# Storia

Dal 1929 GHIDINI PIETRO BOSCO rappresenta una lunga storia di maniglie e coordinati.

Lo sviluppo dell'azienda si inserisce nell'operosa tradizione artigianale ed industriale che caratterizza la Val Trompia situata a nord del capoluogo Brescia nell'Italia settentrionale.

Il soprannome "BOSCO" indicava la località nei pressi della cascina di proprietà di Pietro Ghidini e fu attribuito alla famiglia per distinguerla dai numerosi ceppi omonimi della zona.

Nel 1951 ebbe inizio la specializzazione nella produzione di maniglie che fino ad allora era affiancata alla produzione di posate.

Alla fine degli anni '60 venne edificato lo stabilimento che rappresenta tuttora la sede: da evidenziare l'idea lungimirante di individuare un'area alla confluenza tra due corsi d'acqua che consentirono la realizzazione di un bacino idroelettrico per l'autoproduzione di una parte dell'energia impiegata nei processi produttivi.

Negli anni il costante processo di innovazione tecnologica non si è mai arrestato.

Da ricordare l'operazione che nel 2004 ha portato all'acquisizione di un'azienda specializzata nella produzione di maniglie in alluminio anodizzato che ha dato origine alla divisione denominata GHIDINI ALUMINIUM.

Oggi GHIDINI rappresenta sicuramente un valido riferimento per il settore proponendo un catalogo di soluzioni tecniche e formali per maniglie e coordinati in ottone, lega di zinco (ZAMA), alluminio a cui si affiancano proposte in acciaio inox, nylon e ferro.

# History

Since 1929 GHIDINI PIETRO BOSCO has represented a long history of handles and coordinated products.

The company's development is part of the industrious artisan and industrial tradition that characterizes Val Trompia, located north of the capital Brescia in northern Italy.

The nickname "BOSCO" indicated the location near the farmhouse owned by Pietro Ghidini and was attributed to the family to distinguish it from the numerous homonymous lineages in the area.

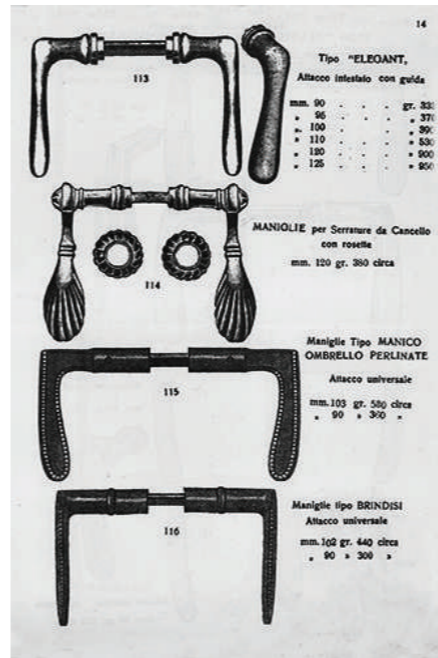

In 1951, the specialization in the production of handles began, which until then had been accompanied by the production of cutlery.

At the end of the 1960s, the factory that is still the headquarters today was built: it is worth highlighting the far-sighted idea of identifying an area at the confluence of two waterways that allowed the creation of a hydroelectric basin for the self-production of part of the energy used in the production processes.

Over the years, the constant process of technological innovation has never stopped.

Worthy of mention is the operation that in 2004 led to the acquisition of a company specialized in the production of anodized aluminum handles, which gave rise to the division called GHIDINI ALUMINIUM.

Today GHIDINI certainly represents a valid reference for the sector by offering a catalogue of technical and formal solutions for handles and coordinated items in brass, zinc alloy (ZAMA), aluminium alongside proposals in stainless steel, nylon and iron.

# Produzione

Fondata nel 1929, Ghidini Pietro Bosco è oggi alla terza generazione di gestione familiare, mantenendo intatti i valori che ne hanno segnato il successo.

Da sempre l'azienda ha saputo evolversi nel tempo, integrando tecnologie moderne e innovazione nel proprio settore. Ghidini Pietro Bosco si sviluppa in due siti produttivi, situati entrambi nella provincia di Brescia, zona con una lunga tradizione nella lavorazione del metallo.

Questa localizzazione strategica permette all'azienda di beneficiare dell'esperienza locale, assicurando al tempo stesso continuità operativa e qualità ai propri clienti.

Il controllo dei processi produttivi garantisce stabilità sia ai suoi collaboratori che ai suoi partner.

# Production

Founded in 1929, Ghidini Pietro Bosco is today in the third generation of the family business, keeping intact the values that have marked its success. The company has always been able to evolve over the time, integrating technologies and innovation in its sector.

Ghidini Pietro Bosco is spread across two production sites, both located in the province of Brescia, an area with a long tradition in metalworking. This strategic location allows the company to benefit from local know-how, while ensuring operational continuity and quality for its customers.

The control of the production processes guarantees stability both to its collaborators and its partners.

# Sostenibilità

L'attenzione alla sostenibilità è da sempre un principio fondamentale dell'azienda. Già dagli inizi degli anni 60 l'azienda dispone di una produzione idroelettrica tramite un bacino artificiale realizzato nei pressi della sede, ancora attivo. Un'attenzione lungimirante anche alla luce delle attuali sfide ambientali. I materiali utilizzati, il controllo dei processi secondo le normative più aggiornate e la scelta di un packaging riciclabile e volto a ridurre i volumi di trasporto, ci permettono di contribuire a un futuro più sostenibile.

Ghidini rispetta i requisiti di legge in materia ambientale e dispone dei permessi e delle autorizzazioni necessari che vengono periodicamente mantenuti aggiornati.

Ghidini sviluppa costantemente strategie atte a ridurre il consumo di risorse energetiche ed idriche e la produzione di rifiuti riducendo l'impatto ambientale delle proprie attività con sofisticati sistemi di depurazione ed impianti a circuito chiuso.

# Sustainability

Attention to sustainability has always guided our choices. Since the early 60s the company has had hydroelectric production via an artificial reservoir built near the headquarters, which is still active. A far-sighted focus also in light of current environmental challenges.

The materials used, the control of processes according to the most updated regulations and the choice of recyclable packaging aimed at reducing transport volumes, allow us to contribute to a more sustainable future.

Ghidini complies with environmental law requirements and has the necessary permits and authorizations which are periodically updated. Ghidini constantly develops strategies aimed at reducing the consumption of energy and water resources and the production of waste by reducing the environmental impact of its activities with sophisticated purification systems and closed-circuit plants.

28 Introduzione / Introduction  
30 Finiture / Finishes

32 7900  
34 141

Scopri le nuove finiture galattiche, disponibili per le maniglie 7900 e 141 e gli accessori dedicati. Una collezione completa che garantisce continuità di immagine.

Totalmente Made in Italy grazie alla produzione di prossimità, queste maniglie sono in alluminio, un materiale sostenibile e riciclabile.

L'alluminio è un materiale responsabile, grazie alla sua capacità di essere riutilizzato all'infinito con un basso consumo energetico, rendendolo fondamentale per un futuro più sostenibile.

La cosmesi del prodotto è studiata in modo da poter garantire lunga vita alle finiture e di conseguenza alle maniglie.

L'argento presente nella maniglia sprigiona gli ioni attivi che agiscono contro i batteri, dando il via ad un naturale e continuo processo antibatterico.

Find out the new galactic finishes, available for models 7900 and 141 and their coordinated accessories. A complete collection of handles that ensures a continuity of image.

Totally Made in Italy thanks to a proximity production, these handles are made of aluminum, a sustainable and recyclable material.

Aluminum is a responsible material, thanks to its ability to be endlessly reused with low energy consumption, making it essential for a more sustainable future.

The anodized finishes have a long-lasting resistance to weather conditions. The silver in the handle releases active ions that act against bacteria, giving rise to a natural and continuous antibacterial process.

Zama é una speciale lega di zinco, alluminio e magnesio particolarmente adatta per pressofusione con cui produciamo articoli che, dopo operazioni di finitura superficiale, vengono sottoposti a trattamenti galvanici di doratura, nichelatura, rodiatura, cromatura nonché all'esclusivo trattamento GHI.CO.TEC.

Zamak is a special alloy of zinc, aluminium and magnesium which is particularly suitable for die casting, used to produce articles which, after surface finishing operations, undergo galvanic treatments with gold, nickel, rhodium and chrome as well as our exclusive GHI.CO.TEC. treatment.

L'ottone é una lega industriale di rame-zinco, nella quale il tenore di zinco é almeno del 50%. I primi utilizzi del rame e delle sue leghe risalgono a 5000 anni fa. Nel nostro caso la lega rappresenta una parte consistente della produzione e nei nostri stabilimenti viene trasformata dallo stato grezzo a semilavorati mediante processi di pressofusione, stampaggio a caldo, tranciatura e imbutitura, tornitura a seconda che si parta da lingotti, spezzoni di barra estrusa, lamiera, barra trafilata.

Brass is an industrial alloy of copper and zinc, of which zinc makes up at least 50%. The first use of copper and its alloys dates back to 5000 years ago. In our case the alloy represents a consistent part of our production and in our factories it is transformed from the original state to semi-finished products using processes of die casting, hot pressing, blanking and drawing, and turning according to whether the product is manufactured from ingots, cut down sizes of extruded bars, sheet or drawn bars.

L'alluminio é sicuramente uno dei metalli non ferrosi più interessanti grazie al suo basso peso specifico ed alla sua buona resistenza alla corrosione che viene notevolmente incrementata mediante ossidazione anodica ed ora anche con l'innovativo trattamento GHI.CO.TEC

L'alluminio è un materiale responsabile, grazie alla sua capacità di essere riutilizzato all'infinito con un basso consumo energetico, rendendolo fondamentale per un futuro più sostenibile.

Aluminium is definitely one of the most interesting non-ferrous metals due to its low specific weight and its strong resistance to corrosion. This feature is considerably increased by means of anodic oxidation and now also by using the innovative GHI.CO.TEC treatment.

Aluminum is a responsible material, thanks to its ability to be endlessly reused with low energy consumption, making it essential for a more sustainable future.

Il Progetto Leonardo rinnova il rapporto con l'oggetto maniglia indirizzandolo verso un uso ampliato realmente utilizzabile da bambini, adulti, anziani o persone con sedia a ruote. Un disegno semplice e "voluminoso" determina con eleganza le forme della maniglia e consente l'impugnarla a diverse altezze. Una forma innovativa e gradevole risolve i temi dell'accessibilità e della praticità d'uso senza barriere formali o psicologiche.

Design for all = utenza universale

Il mondo della progettazione si è sempre rivolto ad un modello ideale di utente (ipotizzato già negli studi dell'uomo vitruviano di Leonardo e sino in tempi più recenti dal Modulor di Le Corbusier): un uomo di età media, di buona costituzione fisica che non ammette varianti. Il mondo reale invece è abitato da bambini, giovani, adulti ed anziani, pertanto anche senza tener conto di disabilità gravi l'utente reale non è in grado di usufruire a pienamente ed in modo autonomo le strutture ed i prodotti che la società gli offre. L'uomo di Leonardo non è superato ma deve essere integrato seguendo l'evoluzione di una società che è più attenta alle esigenze di un design for all e cioè universale (per tutti gli utenti). Il progetto deve quindi rivolgersi verso un'utenza più ampia per soddisfare senza barriere fisiche o psicologiche le diverse esigenze abitative di una società reale. La normativa vigente in tema di accessibilità prevede che le maniglie delle porte, solitamente applicate dalla produzione di serie a 105 cm, sia collocata ad altezza 90 cm. Con la maniglia Leonardo si ha la possibilità di impugnare la maniglia a diverse altezze.

Dfa Italia (Design for All Italia, membro di EIDD - Design for All Europe) ha assegnato alla maniglia Leonardo il prestigioso marchio di qualità Dfa.

The Leonardo Project takes a new look at our relationship with the handle as an object aimed at a wide range of uses. It really can be used by children, adults, old people and people in wheelchairs. A simple, voluminous design determines the elegant shape of the handle and makes it possible to grip it at different heights. An innovative and pleasing shape answers the need for accessibility and ease of use without formal or psychological barriers.

Dfa Italy (Design for All Italy, member of EIDD - Design for All Europe) has assigned to Leonardo handle the prestigious DFA quality marks for its ability to be used by the largest category of users without placing functional or psychological barriers.

443 Maniglioni fissi / Pull handles

L'acciaio è una lega di ferro contenente carbonio fino a circa il 2% ed altri elementi che conferiscono al metallo determinate caratteristiche. In base al loro impiego gli acciai vengono comunemente divisi in acciai di uso generale e acciai speciali. Gli acciai inossidabili (inox) appartengono a questa seconda categoria ed hanno resistenza all'ossidazione ed alla corrosione, caratteristiche determinate dalla presenza in lega di nichel e cromo.

Steel is an iron alloy containing up to 2% carbon and other elements which give the metal certain characteristics. Steels are commonly divided into steels for general use and steels for specific uses according to their final use. Stainless steels belong to the second category and resist oxidation and corrosion, a characteristic which is determined by the presence of nickel and chrome in the alloy.

# Resistenza alla corrosione Corrosion resistance

## Resistenza alla corrosione in riferimento alle norme UNI EN ISO 9227 EN 1670:2007

La norma specifica i requisiti di resistenza alla corrosione degli accessori per porte, finestre, chiusure oscuranti e facciate continue. Si applica anche agli elementi di collegamento metallico richiesti per il fissaggio degli accessori per serramenti.

## Corrosion resistance according to UNI EN ISO 9227 EN 1670:2007

The standard specifies the corrosion resistance requirements for accessories for doors, windows, shutters, and curtain walls. It also applies to the metal connecting elements required for securing the window fittings.

Nel 1995 entra in funzione il nuovo impianto per il trattamento denominato GHI.CO.TEC., Ghidini Coating Tecnology, un nuovo modo di concepire protezione e colorazione di maniglie e coordinati in ottone, Zama, alluminio.

Mediante un processo di cataforesi GHI.CO.TEC. deposita sul metallo resine che aderiscono ad esso per azione di un campo elettrico che si genera nelle vasche in cui i pezzi vengono immersi; con un successivo passaggio a forno la resina si indurisce ed il pezzo assume l'aspetto definitivo. La resina di base è trasparente ed incolore, ma con l'aggiunta di pigmenti potrebbe assumere qualsiasi colorazione. nel nostro caso utilizziamo la protezione incolore su ottone lucidato e quella "gialla" su zama ed alluminio.

Per l'ottone, GHI.CO.TEC., è dunque un'alternativa alla tradizionale verniciatura trasparente. Mentre per zama ed alluminio in un unico passaggio, il pezzo si colora, assumendo il tono dell'ottone, e si protegge dall'ossidazione e dall'usura con un deposito diretto sul metallo di base. Il rivestimento ha uno spessore assolutamente uniforme e garantisce caratteristiche di resistenza ad usura e ossidazione superiori a quanto ottenibile con i trattamenti tradizionali.

Da non trascurare l'aspetto ecologico del processo che lavora completamente a ciclo chiuso, quindi senza scarichi nell'ambiente e senza sviluppo di fumi o sostanze nocive per gli operatori.

In 1995 the new plant for the GHI.CO.TEC., Ghidini Coating Technology, started working.

This new plant is a new way to conceive protection and colouring of brass, zamak or aluminium handles and co-ordinates.

By means of a cataphoresis process, GHI.CO.TEC. deposits resins on metal and they adhere to it through an electric field which is generated in the bath tank where the pieces are dipped; with a further kiln step, the resin hardens and the piece takes the definite look.

The basic resin is transparent and colourless, but adding pigments, it can acquire any sort of colour. In our case we use a colourless protection on polished brass and a "yellow" protection on zamak or aluminium.

As far as brass is concerned, GHI.CO.TEC. is therefore a great change to the traditional transparent coating. Instead of treating zamak and aluminium with the usual brass coating galvanized system, with a single GHI.CO.TEC. operation, it is possible to colour the article and at the same time give it the right protection from oxidation.

The coating is absolutely uniform as far as the thickness is concerned and guarantees those characteristics of hardness, adhesion, resistance to solvents and to corrosion in saline fog, with better results compared to those which could be reached by means of traditional treatments.

The ecological aspect has to be taken into account as well, being the process a closed cycle, therefore no emissions in the environment, no fumes or dangerous substances for the operators are developed.

# G-plus

## G-PLUS

Ghidini group, proseguendo la propria ricerca che tende ad offrire i migliori caratteri tecnici e formali, presenta G-PLUS: il più aggiornato sviluppo della tecnologia PVD (Physical Vapour Deposition) applicata alle maniglie ed ai coordinati. Superficie dura e compatta, grande resistenza alle abrasioni ed alle aggressioni atmosferiche ed un piacevolissimo colore vivo dell'ottone sono i caratteri che distinguono G-PLUS.

G-PLUS realizza rivestimenti ad elevate caratteristiche mediante condensazione sotto vuoto sulla base da rivestire di vapori ottenuti con fattori fisici.

G-PLUS prevede una reazione fisica tra ioni di zirconio che si depositano sulla base in ottone precedentemente nichelata e cromata.

La generazione dei vapori avviene per effetto di una scarica ad arco sotto vuoto tra un catodo, ovvero la sorgente dei vapori stessi e la camera in cui avviene l'intero processo.

Le maniglie ed i coordinati trattati con G-PLUS godono di caratteristiche ampiamente superiori rispetto a quanto possibile con tutti i trattamenti tradizionali. Prendendo come termine di confronto la cromatura galvanica otteniamo:

G-PLUS ha superato severi test di laboratorio che ci consentono di certificare:

- Aderenza 100% secondo la normativa UNI-ISO 4524/5
- Nessuna alterazione dopo 1000 ore di prova accelerata di resistenza alla luce secondo la normativa UNI 9397
- Nessun intacco da parte di acido cloridrico, solforico, nitrico, ossalico, acetico e citrico, soda e potassa caustica, cianuri e sgrassature alcaline a caldo.

I risultati di protezione del trattamento G-PLUS permettono, anche ai clienti più esigenti, di ottenere maniglie e coordinati con una superficie di durezza paragonabile all'acciaio, resistenza agli agenti atmosferici che ne permette l'uso anche in esposizioni esterne in ambienti aggressivi, brillantezza del colore dell'ottone grazie alla protezione inalterabile nel tempo, garanzia illimitata perchè la protezione offerta supera anche i limiti di garanzia previsti per legge.

# G-plus

## G-PLUS

Carrying on their research in order to offer the best technical and formal features, GHIDINI group are presenting G-PLUS: the most up to date technological development: PVD (Physical Vapour Deposition) applied to handles and co-ordinates. Hard and compact surface, great abrasion proof, atmospheric aggression resistant and a very pleasant vivid brass colour are the features which distinguish G-PLUS.

G-PLUS is the result of the most innovative deposition technique PVD, by means of which it is possible to carry out coatings having high features through vacuum condensation of vapours obtained with physical factors on the surface to be coated. In the G-PLUS case, a physical reaction among zirconium ions (ZrN) which are deposited on the brass surface previously nickel and chromium plated is foreseen. The vapours are originated by means of vacuum discharge pressure between a cathode, that is the source of vapours and the chamber in which the entire process takes place. The handles and coordinates treated with G-PLUS have characteristics which are vastly superior compared to what obtainable by means of traditional treatments. G-PLUS underwent severe laboratory tests which allow us to certify:

G-PLUS underwent severe laboratory tests which allow us to certify:

- 100% adhesion according to UNI-ISO 425415 Norm.
- No alterations after a 1000 hour accelerated resistance to light test according to UNI 9397 norm.
- No indentation was caused by using hydrochloric, sulphuric, nitric, oxalic, acetic and citric acids, caustic soda and potassium hydroxide, cyanide and alkaline and hot degreasing.

The protective results of G-PLUS treatment allow, even to the most demanding customers, to obtain handles and coordinates with a hardened surface which can be compared to steel, which is resistant to external atmospheric agents and which can be placed externally even in saline fog. Thanks to the inalterability of protection, the brass colour brightness doesn't change and an unlimited guarantee due to protection which goes even beyond the limit guarantee foreseen by the law. G-PLUS a protection unlimited guaranteed for people who want beautiful long lasting handles.

# Avvertenze

## PRECAUZIONI PER INSTALLATORI ED UTILIZZATORI FINALI

**Protezione dall'acido tannico:** nelle finestre e porte-finestre in legno di rovere o altre essenza con un elevato contenuto di tannino, assicurarsi che questo non possa evaporare dal legno. La guarnitura non deve avere contatto diretto con una superficie del legno non trattato.

**Protezione da sigillante:** non utilizzare mai sigillanti a reticolazione acetica o contenenti altre sostanze aggressive, ad esempio acido formico o acetico, composti di ammoniaca, aldeide, fenoli, cloro, tannino ecc., perché sia il contatto diretto con il sigillante che i vapori di queste sostanze possono aggredire la superficie dei particolari.

Durante i lavori in genere, demolizione, ristrutturazione, realizzazione di intonaci e tinteggiatura, riparare le guarniture (comunque tutti i nostri prodotti) dal contatto con polveri, calce, intonaco, tempere e smalti vari. Fare aerare bene il locale prima di togliere le protezioni, il consiglio se possibile sarebbe di montare le guarniture dopo aver eseguito i lavori e dopo essersi assicurati che il locale sia stato ben aerato.

**Pulizia e protezione da detergenti aggressivi contenenti acidi:** pulire le guarniture esclusivamente con panno morbido e detergenti a pH neutro diluito. Non usare mai detergenti o abrasivi aggressivi contenenti acidi. Questi potrebbero danneggiare le guarniture.

La non osservanza delle suddette indicazioni può causare danni irreparabili al prodotto.

# Warnings

## PRECAUTIONS FOR INSTALLATION AND CONSUMERS

**Tannic acid protection:** in the windows and glass doors in oak or other trees with a high tannin content, make sure that this can not evaporate from the wood.

The crank should not have direct contact with a surface of untreated wood.

**Sealant protection:** Do not use any sealant acetic or other aggressive substances such as formic acid, acetic acid, ammonia compounds, aldehyde, phenol, chlorine, tannin etc., for a direct contact with the sealant, the vapors of these substances can damage the finishings of the products.

During general maintenance, demolition, renovation, plastering and painting, repairing the cranks (though all of our products) from contact with dust, lime, plaster, tempera and various glazes.

Make sure the rooms are ventilated enough before removing the protections. The best advice if possible is to mount the cranks after performing other works and after making sure that the premises was well aerated.

**Cleaning and protection from detergents containing acids:** clean the cranks only with soft cloth and neutral pH detergent diluted. Never use harsh or abrasive cleaners containing acids.

These could damage the crank.

The non-observance of these instructions may cause irreparable damage to the product.

# Condizioni Generali di Vendita

## PREZZI

I prezzi indicati in questo listino sono espressi in euro, iva esclusa e si intendono franco fabbrica. Ghidini Pietro Bosco Srl si riserva in qualunque momento di modificare i prezzi presenti in questo listino, facendo il possibile per comunicare per tempo eventuali aggiornamenti. I prezzi indicati non sono vincolanti e possono essere soggetti a variazioni.

## ARTICOLI

Tutti gli articoli presentati con il precedente Listino Illustrato 2019, ma non citati in questa edizione sono usciti di produzione, pertanto eventuali ordini in corso saranno evasi fino ad esaurimento delle scorte. Ogni variante rispetto agli articoli a listino è da considerarsi prodotto speciale per il quale, di volta in volta, è necessario richiedere fattibilità, quantità minima, prezzo. La fornitura di prodotti speciali a richiesta è subordinata all'accettazione da parte del committente della relativa conferma d'ordine. La Casa si riserva il diritto di approvare modifiche agli articoli e variazione dei prezzi senza preavviso. Per prodotti speciali approntati a richiesta non si accettano resi per alcun motivo.

## MODELLI, DIMENSIONI, PESI

Ghidini Pietro Bosco Srl si riserva, in qualunque momento e senza preavviso, di modificare e/o sopprimere gli articoli del presente catalogo. Dati, misure o schemi su questo catalogo hanno solamente carattere informativo, non sono vincolanti e possono essere soggetti a variazioni.

## ORDINI

Verranno accettati solo ordini per iscritto; ordini pervenuti telefonicamente o verbalmente non saranno ritenuti validi. Con la trasmissione dell'ordine il cliente accetta tutte le condizioni elencate di seguito. L'ordine è vincolante per il cliente, mentre impegna Ghidini Pietro Bosco Srl solo dopo espressa accettazione. Non possono essere effettuati annullamenti senza l'accordo scritto di Ghidini Pietro Bosco Srl, che si riserva comunque di applicare oneri e spese che ne derivino.

Il minimo importo netto merce fatturabile è di € 200,00.

## TERMINI DI CONSEGNA

I tempi di consegna dell'ordine decorrono dalla data della nostra conferma salvo diversa stipulazione e non potranno in nessun luogo dare luogo ad indennizzo/risarcimento da parte di Ghidini Pietro Bosco Srl. I termini di consegna indicati nell'ordine sono da intendersi puramente indicativi e non vincolanti per Ghidini Pietro Bosco Srl, che non sarà responsabile di eventuali ritardi. In particolare non è responsabile per ritardata o omessa consegna, totale o parziale, imputabile a cause di forza maggiore, o ad eventi che siano fuori dal suo controllo, quali, in via esemplificativa, scioperi aziendali e di trasporto, mancanza di energia elettrica, mancata o ritardata ricezione di materie prime, ecc. Ghidini Pietro Bosco Srl si riserva il diritto di evadere l'ordine anche con spedizioni parziali.

## DATI IDENTIFICATIVI DEL CLIENTE

Il cliente è responsabile della comunicazione dei propri dati fiscali forniti in base alla legislazione vigente (Ditta, Ragione sociale, Sede, Partita IVA). I dati del cliente saranno custoditi ed elaborati per adempimenti degli obblighi di Legge. Ogni altro utilizzo dovrà essere espressamente autorizzato dal cliente.

## SPEDIZIONI

La merce viaggia a rischio e pericolo del committente franco stabilimento Ghidini Pietro Bosco Srl che declina comunque ogni responsabilità per ritardi o rotture verificatesi durante il trasporto. Spetta al committente verificare la merce in arrivo e contestare eventuali danni direttamente al trasportatore, anche se questi è stato scelto da Ghidini Pietro Bosco Srl, entro 8 giorni dal ricevimento della stessa mediante raccomandata A.R. Si accettano eventuali reclami sulla quantità di pezzi ricevuta al massimo entro 8 giorni dalla data di consegna.

## PAGAMENTO

I pagamenti devono essere effettuati direttamente a Ghidini Pietro Bosco Srl nei termini pattuiti. Trascorsi i termini Ghidini Pietro Bosco Srl provvederà senza alcun preavviso all'addebito degli interessi di mora stabiliti per Legge, che decorreranno dal giorno immediatamente successivo alla scadenza del debito. Il mancato rispetto dei pagamenti pattuiti, comunicati per iscritto nelle conferme d'ordine, può comportare, a discrezione dell'azienda, il blocco degli ordini in corso fino a pagamento avvenuto e la sospensione delle ulteriori forniture anche se già accettate. I pagamenti dei prodotti già consegnati non saranno subordinati al completamento dell'ordine. Nessun pagamento potrà essere differito nel caso di contestazioni salvo accordi diversi. Fino al momento in cui Ghidini Pietro Bosco Srl non abbia ricevuto il pagamento del valore complessivo dei prodotti, gli stessi rimarranno di esclusiva proprietà di Ghidini Pietro Bosco Srl.

## RESPONSABILITÀ

Non si accettano merci di ritorno se non rese in Porto Franco e preventivamente autorizzate da Ghidini Pietro Bosco Srl. Solo il materiale riscontrato difettoso da Ghidini Pietro Bosco Srl sarà sostituito gratuitamente senza nessun altro indennizzo per danni, spese o riparazioni. Ghidini Pietro Bosco Srl non si assume alcuna responsabilità e alcuna garanzia è prevista per difetti e danni derivanti da installazione impropria o cattivo uso. È vietato agli acquirenti effettuare qualsiasi lavorazione che modifichi le caratteristiche originarie dei prodotti Ghidini Pietro Bosco Srl.

## CONTROVERSIE

Le forniture sono soggette alla Legge italiana. Per qualunque controversia è riconosciuta la sola ed esclusiva competenza del Foro di Brescia, Italia.

## TERMINI DI GARANZIA

Si certifica che i prodotti Ghidini Pietro Bosco Srl sono interamente prodotti in Italia nelle nostre Aziende, salvo dove espressamente indicato. Ogni articolo, stampato o fuso e lavorato a mano è unico ed irripetibile e le piccole differenze cromatiche, che possono riscontrarsi, rappresentano la garanzia più certa dell'artigianalità del prodotto. Eventuali imperfezioni e/o differenze nella forma, nelle finiture e nei materiali sono da attribuire alla tecnologia e/o alle operazioni manuali necessarie alla lavorazione del prodotto. L'inosservanza delle istruzioni di montaggio e/o una non cura nell'utilizzo dei prodotti Ghidini Pietro Bosco Srl possono causare il mal funzionamento per i quali si declina ogni responsabilità.

## CONSIGLI PER LA PULIZIA, LA CURA E LA MANUTENZIONE DEL PRODOTTO

Si consiglia di pulire i prodotti Ghidini Pietro Bosco Srl utilizzando solamente un panno asciutto o leggermente inumidito con acqua. Non utilizzare assolutamente alcun detergente chimico per non alterare l'efficacia del trattamento superficiale.

# General Terms and Conditions of Sales

## PRICES

Listed prices in this price list are expressed in Euros and are intended ex works. Ghidini Pietro Bosco Srl reserves the right to modify at any time the prices; every reasonable attempt will be done to provide adequate notice of price updates. Prices here indicated are not binding and subjected to possible variations.

## ITEMS

All items presented in the previous Illustrated Price List 2019 but not mentioned in this edition are discontinued; therefore, any outstanding orders will be fulfilled until stock is exhausted. Any variation from the listed items is considered a special product, for which feasibility, minimum quantity, and price must be requested on a case-by-case basis. The supply of requested special products is subject to the client's acceptance of the corresponding order confirmation. The Company reserves the right to approve modifications to items and price changes without prior notice. Returns are not accepted for special products prepared upon request, for any reason.

## MODELS, DIMENSIONS AND WEIGHTS

Ghidini Pietro Bosco Srl reserves the right, at any time, to change and/or to cancel the items of this catalogue. Information, size or drawings in this catalogue are only for information and are not binding.

## ORDERS

Orders are accepted only in written form; orders or modifications communicated verbally and/or by phone will not be valid. Customers accept and are aware that their order is subject to the following general sale terms and conditions. Ghidini Pietro Bosco Srl is not legally bound by an order until we have confirmed it in written form but the Customer is bound when he/she accepts it. No cancellation of the order is valid without written agreement from Ghidini Pietro Bosco Srl, which reserves the right to apply charges.

The minimum net invoiceable goods amount is €200.00.

## DELIVERY TERMS

Delivery time starts from the order confirmation date, unless otherwise agreed, Ghidini Pietro Bosco Srl will not recognize any indemnity or compensation. The order delivery terms are purely indicative and not binding for Ghidini Pietro Bosco Srl, which is not responsible for any delay. Ghidini Pietro Bosco Srl is not liable for delayed or skipped delivery in its totality or partiality, due to acts of God or other event out of its control, like for example labour or freight strikes, lack of electric energy, missed or delayed raw material receipt and so on. Ghidini Pietro Bosco Srl reserves the right to dispatch orders even with partial shipment.

## CUSTOMER INFORMATION

The Customer is responsible for all the identification information data requested by the legislation in effect (Company name, legal name, Address, VAT, etc.). All Customer's data will be kept and used in full compliance with the Italian Law. All other use must be specifically allowed by the Customer.

## DELIVERIES

Ordered goods will be at the Customer's risk from the moment of delivery so Ghidini Pietro Bosco Srl declines any responsibility for delays or damage caused during the shipment. The Customer is responsible for checking the delivered goods and reporting possible damage to the forwarder, even if chosen by Ghidini Pietro Bosco Srl, within 8 (eight) days from receipt by certified mail. The Customer is also responsible for checking the quantity of the delivered goods; claims about quantity will only be accepted within 8 (eight) days from receipt.

## PAYMENTS

Payments shall be made directly to Ghidini Pietro Bosco Srl in the manner and at the time agreed by the parties. In the event of failure to make the payment at the due date, the Customer will, with effect from the invoice date, be charged of interests and penalties. If the Customer is in default, Ghidini Pietro Bosco Srl shall have the right to defer shipment or any future order intake or delivery until such default is remedied or said credit reestablished to our satisfaction. No claim shall enable the customer to suspend payments. The payment of products already delivered shall not oblige Ghidini Pietro Bosco Srl to complete the order. In case of disagreements payments cannot be deferred, unless otherwise agreed. Until the receipt of payment for the total value of the goods ordered, Ghidini Pietro Bosco Srl will be and remain the sole and only proprietor of the goods.

## RESPONSABILITY

Ghidini Pietro Bosco Srl does not accept return of goods without prior approval, in all cases costs for goods returns must be borne by the Customer. Only faulty goods found by Ghidini Pietro Bosco Srl will be replaced free of charge without any other indemnity or refund for damage or repairs. Ghidini Pietro Bosco Srl is not responsible for any faulty goods which have been manipulated in a bad way. Any damage caused by improper installation or use is not covered by any guarantee. Customers are not authorized to rework Ghidini Pietro Bosco Srl products.

## CONTROVERSY

Orders are governed by the Italian Law. If the parties cannot reach amicable settlements, disputes shall be referred uniquely to the competent civil court in Brescia.

## WARRANTY

We certify with our complete and utmost corporate integrity that Ghidini Pietro Bosco Srl products are produced solely within our Italian manufacturing facilities, if not expressly indicated. Each piece of hardware, forged or cast is hand-crafted to perfect the uniqueness in design and finish. The guarantee of originality is due to the fact that the finish of each product is slightly different than the previous item. Any imperfections or differences in form, finishes and materials are to be attributed to the technology or manual operations necessary for processing the product. Failure to comply with the instructions and/or a lack of care in use may cause damages for which Ghidini Pietro Bosco Srl declines all responsibility.

## CLEANING SUGGESTIONS

In order to maintain the quality of the protective treatment and uniqueness of all finishes of Ghidini Pietro Bosco Srl products do not attempt to clean with detergents and/or chemicals. Hence, simply use a lightly water moistened cloth to clean the items.
